

**2003 Stormwater BMP Tour**

**Coordinate a tour of storm water BMPs for practitioners**

**Activity Title:** Tour of Storm Water Best Management Practices

**Activity Description:** Jack Webb, Executive Director of the Indian Lake Watershed Project provided both oral and printed background information about the successful 14-year-old watershed project in the headwaters of the Great Miami River.

**Start Date:** 9/19/2003 **End Date:** 9/19/2003

**Result Statement:** Approximately 20 individuals enjoyed the watershed Best Management Practice tour. Sites featured BMPs that have both urban and rural applications: a few storm water retention/wetland/flood-prevention installations, secondary containment at a fertilizer and fuel storage area, filter strips, and stream bank stabilization. See below for a list of attendees.
