

## Miami Conservancy District's Stormwater Activities

### **2005 Stream Team**

**Stream Team volunteer monitors collect data and report on stream health during field season**

**Activity Title:** Stream Team

**Activity Description:** The Miami Valley Stream Team is a volunteer water quality monitoring program. Stream Team trainings were held to train volunteers how to monitor the health of our streams and rivers.

**Start Date:** 5/7/2005 **End Date:** 5/7/2005

**Result Statement:** Over thirty volunteers were trained on how to monitor stream health through water quality monitoring. These volunteers collect information on their local streams in order to increase public involvement in water quality issues; educate local communities about the relationship between land use and water quality; and provide water quality information to citizens and organizations working to protect the Great Miami Valley's rivers and streams.
