

Implementation Schedule of Miami Conservancy District's 2006 Activities

The following is Miami Conservancy District's implementation schedule representing a summary of the storm water activities MCD plans to undertake from January 24, 2006 to January 24, 2007.

Minimum Control Measure #1

TRAINING: Miami Conservancy District plans to hold two training opportunities for technical audiences and / or facilitate the attendance of key professionals at regional training opportunities.

MCD is currently planning a technical training on post construction stormwater management in new development and re-development. This innovative training is targeted for municipalities.

TOUR OF STORMWATER BMPs: Miami Conservancy District plans to coordinate a tour of storm water Best Management Practices for at least 10 practitioners.

MCD is currently considering a couple options for the BMP tour this year. The tour will either include storm water BMPs completed with assistance from the USEPA Watershed Initiative Grant or a tour of the Sanitation District No. 1's Public Service Park in Northern Kentucky.

Minimum Control Measure #2

STREAM TEAM: Miami Conservancy District plans to facilitate stream team training for 20 new volunteers throughout the Great Miami River Watershed in the 2006 reporting year.

Miami Conservancy District is planning on working with The BW Greenway Community Land Trust in facilitating stream team training for 20 new volunteers throughout the Great Miami Watershed.

GREAT MIAMI RIVER WATERSHED NETWORK: Miami Conservancy District plans to facilitate four Great Miami River Watershed Network meetings in the 2006 reporting year.

The Great Miami River Watershed Network decided to meet on the first Thursday of the months of March, June, September, and December during 2006.

WATER FESTIVALS: Miami Conservancy District plans to support and participate in two children's water festivals throughout the Great Miami River Watershed in the 2006 reporting year.

MCD will continue to provide financial and staff support to the Dayton Children's Water Festival scheduled for May and the Butler County Water Festival in October.

Minimum Control Measure #3

OUTFALLS: Miami Conservancy District plans to continue locating outfalls in the Great Miami River Watershed.

MCD's plan for 2006 is to identify outfalls in cities along the Great Miami River, the Mad River and the Stillwater River. Once the data is collected, MCD will meet with the city to show them what has been done and the data will be posted on Miami Conservancy District's Phase II Application and Database Information System (PADIS).
