

Implementation Schedule of Miami Conservancy District's 2007 Activities

The following is Miami Conservancy District's implementation schedule representing a summary of the stormwater activities MCD plans to undertake from January 24, 2007 to January 24, 2008.

Minimum Control Measure #1

TRAINING: Miami Conservancy District plans to hold two training opportunities for technical audiences and / or facilitate the attendance of key professionals at regional training opportunities.

MCD is currently planning an environmental issues forum tentatively set for April 26, 2007.

TOUR OF STORMWATER BMPs: Miami Conservancy District plans to coordinate a tour of stormwater Best Management Practices for at least 10 practitioners.

In September, 2007, MCD is planning a tour of the following Best Management Practices: the Hidden Hills wetland in Fairborn and the rain garden at the Fairborn Senior Center.

Minimum Control Measure #2

STREAM TEAM: Miami Conservancy District plans to facilitate stream team training for 20 new volunteers throughout the Great Miami River Watershed in the 2006 reporting year.

Miami Conservancy District is planning on facilitating a stream team training for 20 new volunteers within the Great Miami River Watershed.

GREAT MIAMI RIVER WATERSHED NETWORK: Miami Conservancy District plans to facilitate four Great Miami River Watershed Network meetings in the 2006 reporting year.

The Great Miami River Watershed Network plans to meet on the first Thursday of the months of March, June, September, and December during 2007.

WATER FESTIVALS: Miami Conservancy District plans to support and participate in two children's water festivals throughout the Great Miami River Watershed in the 2007 reporting year.

MCD will continue to provide financial and staff support to the Dayton Children's Water Festival scheduled for May and the Butler County Water Festival in October.

Minimum Control Measure #3

OUTFALLS: Miami Conservancy District plans to continue locating outfalls in the Great Miami River Watershed.

MCD's plan for 2007 is to continue identifying outfalls in urbanized areas along the Great Miami River and Stillwater River. Once the data is collected, MCD will meet with the municipality to show them what has been done and the data will be posted on Miami Conservancy District's Phase II Application and Database Information System (PADIS).
